

PROFILE

Computer Science and Engineering undergraduate specialising in Cyber Security, with hands-on experience building full-stack web applications, REST APIs, and IoT systems. Seeking a software engineering internship to apply strong fundamentals in programming, data structures, and secure development practices.

EDUCATION

Chennai Institute of Technology

B.E. Computer Science and Engineering (Cyber Security)

CGPA: 8.41

Chennai, India

Narayana E Techno School — CBSE, Class XII

88%

Velammal Vidyashram — CBSE, Class X

89%

TECHNICAL SKILLS

Languages	C, C++, Python, SQL
Web Development	HTML, CSS, REST APIs, Responsive Design
Tools & Platforms	Git, GitHub, Visual Studio Code
Core Concepts	Object-Oriented Programming, Data Structures & Algorithms, DBMS, Networking Fundamentals
Strengths	Communication, Problem-Solving, Team Collaboration

INTERNSHIP EXPERIENCE

SafeNServe Pvt Ltd | Web Developer Intern

Chennai, India

- **Developed** responsive, cross-browser web interfaces with HTML, CSS, and JavaScript, improving usability across screen sizes.
- **Integrated** REST APIs to connect frontend components with backend services, enabling dynamic, data-driven page content.
- **Strengthened** features through structured debugging and testing, reducing defects before release.
- **Collaborated** with the development team using Git and GitHub in an Agile workflow of sprints, reviews, and stand-ups.

PROJECTS

Sentinel — FinTech Web Application

Full Stack · REST APIs · Authentication

- **Built** a full-stack FinTech platform with secure authentication and a real-time financial analytics dashboard.
- **Engineered** REST APIs and a scalable backend over a relational database for structured, secure transaction data.

Apex Haul — Logistics & Fleet Platform

Full Stack · Route Optimization

- **Developed** a logistics platform that optimises fleet routing and eliminates empty truck return trips.
- **Implemented** route logic for truck dimensions, road compatibility, and tunnel clearance, plus driver rest scheduling for safer trips.

SBI Lore Engine — Secure Banking Portal

Full Stack · Secure Development

- **Architected** a secure banking web application with authentication and protected user data management.
- **Designed** interactive product dashboards on a modern web architecture to drive customer engagement.

HydraSense — IoT Safety Monitoring System

IoT · Embedded Systems

- **Integrated** fluid leakage and motion sensors into an embedded system for real-time environmental monitoring.
- **Automated** alert generation on sensor thresholds, enabling instant hazard detection and response.

Abyssal Sync — Clinic Queue Management

Healthcare · Database Design

- **Optimised** appointment scheduling and queue handling to reduce patient waiting time at clinics.
- **Built** database-backed patient flow tracking, improving day-to-day operational efficiency for staff.

CERTIFICATIONS

Introduction to Cybersecurity — Cisco

Python Essentials 1 — Cisco

Introduction to Networking — NVIDIA

Python Essentials 2 — Cisco
